In view of applicant's comments and a rereading of the original disclosure (specification, drawings and claims) the examiner considers "strand" to be limited to a structure that has any round cross-section (diameter) as opposed to something that is merely relatively long and thin. Note, for example, Ando figure 8 which teaches resident elements which have a width of 80 μm 's height of 10 μm 's and a length of 1706 μm (rectangular cross-section).
